

THE ENERGY BALL®

As Seen on MSNBC, Fox News and Extreme Home Makeover

Produces Clean Energy from the Wind

A new Technology in Small Wind Turbines,
Specifically Designed for Residential and Urban Areas.

Two Models: V100 rated at 650 Watts
 V200 rated at 2500 Watts

- Aesthetically appealing
- Negligible cast shadow or shadow flicker
- Roof, pole or facade mounting
- Easy to install, operate and maintain
- Low cut-in speed
- Nominal Noise and Vibration
- Installed in urban and rural areas
- Residential or business locations
- Integrated wind/solar system capable of producing energy 24/7
- Uses wind; a clean renewable energy to produce electricity
- All Federal rebates and Incentives apply
- Advanced inverter designed for small wind that follows the power curve in milliseconds

V100 \$6,400.00 less 30% Fed Credit = **\$4,480 Net Total Cost**

V200 \$9,900.00 less 30% Fed Credit = **\$6,930 Net Total Cost**

Pole & Labor not included
